The Sickneses of this present yeare.

After the computation of Astronomy,
the Yeare is deuided in iiii. quarters,
winter, spring tyme, sommer, and har-
nest tyme. Winter doth begyn whe the sonne
commeth

cometh vnto the solstice hyemall first degree
of Capricorne that was þ xiii. day of Decēber
last about none. The first newe mone of this
winter was the xxviii. day of Decēber at v. of
the clocke xl. minutes after none. Leo, was in
the first house signe ascēdāt. Taurus in vii. do-
mo Aquari^o, was in vii. domo, Pisces domus
ionis, was in viii. domo. All thys do signifie
that som Ecclesiastike old person shall be be-
red, Obstructione & duritie splenis, Timpa-
nia tumore abdominis, wherin some of them
shall be in daunger of death; and other shall
fele greuous peines in the syde, as pleuresye,
Phlegmone costas membranæ succingentis,
whiche shall bring greuous accidētēs. Dolor
lateris pūgitiu^o, difficultas respirationis, Pulsus
ferrinus, & durus febris continua, & some per-
sones that haue yltake and colike passion, and
other colde syckenesses of the guttes.

Also olde persones shall suffre greate
pynes in the secreete partes, wyth
strangury, dysury, ysturye, id est supres-
sio vrine. Also many greuous syckenes-
ses nerte to the partes Vitales, as, diph-
nea, inflamatio pulmonis, Dolor metaphreni,
& mediastini, with shortnesse of breath.
Also in thys winter many persones
shall

B. ii.

Shall haue colde teumes dystillynge
frome the heade downe, some in the
mouthe, some by the nose, some in the
throte wyth swellynge, as sinanchye.
And some persons shall haue the py-
pes of the lunges stopped with great
coughynge, and stoppyng of the brest.
Also Poplesey, Palsey, Spasma, Epilepsia
and other colde sicknesse, procedynge
from the heade. Also dropie and swell-
ynge in the body, Podagra, and cold sick-
nesses of the iointes and synewes,
Id est neruorum.

Of the Sickneses of the sprynge tyme.

The sprynge tyme dothe begynne
when the sonne cometh vnto
the Equinoctiall vernal, that is
when the sonne entreth in the first de-
gree of Aries, and that shall be the. xi.
day of Marche afore one of the clocke
after none, Capricornus shall bee in. vii.
domo,

domo, Cancer in prima, the constellation
with the generall influence in this
poinct Equinoctial, dothe signifie the
syckenesses that shall reygne in the
Sprynge tyme, the second quarter of
thys yeare shalbe variable and dāge-
rous, as Agues, Amphimerines, Conti-
nuees & intermitantes. Agues procedyng
of abundance of hot & corrupte blood,
as Synochus cum putredine, and agues
tertianes. By that cause yonge men
cacochimikes oz plectozikes, and spe-
cially lunatique persones of nature,
shalbe in daunger of soubdaine death.
Also Quia prauī humores emergūt à centro
Corporis ad partes superficiales, som per-
sons full of yll and aduste blood, shal
haue apparition of lepre, pimples in
the face, Guita rosacea, deartres, scabbes
morphea alba & nigra. Also effusyon of
bloude by the nose, runnyng bloudde
hemorroidall, peyn in the ioyntes, and
the bones, as Arterica & Sciatica passio
Cyragra, with swellng in the handes,
B, iii. legges

legges, & the fete, spyttyng of bloude,
peyne vnder the rybbes, nexte to the
harte, with thorte breath. Also many
persons shall fall in yelow and blacke
iaunders, by the ill disposition of the
lyuer, and the splene, whyche shalbe
harde and styffe. Also many younge
persones shal haue vomites, coleriks,
& phlegmatikes, with greuous payne
in the stomake and the heade.

Of the sicknesse of Sommer.

Sommer the thyrde quarter of
this yere, beginneth when the
sonne commeth vnto the Sol-
stice Estiuall, and is when he entreth
in the fyrste degree of Cancer, and that
is between the xi. and xii. day of Iune,
aboute mydnyght, where I fynd, Aries
prima domus. signe ascendant. Libra. vii.
domus, Capricornus. x. domus Mars is
dominator ascēdētis. Also, dominator Scor-
pionis. viii. domus. All this constellation
and generall influence doth signifie,
that in the sommer many hatysse and
dange

Dangerous sicknesſes ſhall reygne.
Like. ynochos ſine putredine, & Synochos
cū putredine. **Alſo agues** Ardantes & cau-
ſaoniques, ſhall abunde in the ſommer:
wherfoze many colerikes, yonge and
martiall perſons ſhalbe in peryll of
death, as the conſtellation afore wryt-
ten, doth ſignifye, wherin Mars was
dominator. viii. domus Scorpio. **Alſo,** Optal-
mia oculorū phlegmone, great peine in the
head with ſwellyng in y face. **Alſo** vlc-
ratio in y tongue, in y mouth as Paril-
rhima alcol. **Alſo** ſwelling in the throte
and vlceration, as ſynanchy, Fauciū &
gutturis morbus. Eriā cardiaca paſſio & cor-
dis palpiratio, & ſyncopo preceps facultatis
vitalis. **laptus** procedynge of agues cau-
ſonikes hot and peſtilentiaſſe, and of
ſuche ſycknesſes many perſons ſhalbe
in daunger of death, ſpecyallye they
that be of ſanguine and colerike com-
plexion.

¶ The Syckneſſe of the
harnett tyme.

B. liii.

Harnett

Haruest or autūnall tyme: the iiii.
Quarter of this yeare, begynneth
when the sonne commeth vnto
the Equinoctiall autumnall, that is,
when the sonne entreth in the fyfste
degree of Libra, and is the xii. daye of
September about noone, wherin Ca-
pricornus, is Prima domu., signe ascen-
dāt, Cancer. vii. domus, Libra. x. therefore I
say, y in y haruest tyme shal reigne va-
riable & erratiques agues, proceeding
of adust humour sanguine colerike, &
melancoly as agues, both y Continues
& intermitantes, whyche shall chaunge
in quartaine agues, by reson of the ob-
structiō & the hardnesse of the splene.
Specialllye a man solitary and of sa-
turniall complexiō shalbe vexed much
of suche sycknesse. Also many other
persons shal fall in a quartaine ague,
blacke and yelowie iaunders. Also
timpanye, swellynge, and hardenesse
of the stomacke, and bealpe. Also
Tabes morbus vel ptifis, vlceration of the
luniges

lunges, with consumption of the bo-
dye. Also the Colyke and Stone, with
supprellion of the Uryne, Strangu-
rye, with greate paynes in the secrete
partes. Also sicknesles of þ guttes, as
lare diarike, henterike & dissenterike,
colike, and iliake passion, coloes, gout-
tes, as Podagra, and Sciatica. Also swell-
lyng in the throte and in the face, as
squinanchy. Also coughynge, behe-
ment peines vnder the rybbes, wyth
stopping of breath. I sai also, that som
cold reumes and distillations fallyng
frome the heade vpon the necke, the
backe, and the Shoulders, shall cause
greuous peines, and some tyme suche
reume shall abounde in the nose and
in the throte, and cause Corry sam, & vo-
cis raucedinem, and if he do distill vpon
the lunges, Pariet asma & diphneam.

COf Peace and Warre.

The

She iiii. daye of January at .i. of
the clocke xl. minutes in the
mozyngge, Mars & Luna, sunt in
coniunctione in Capricorno, Tertia domo.
Scorpio est prima domus, signum ascendens,
& Mars est dominator. **The xxvii. daye at**
x. of the clocke afoze noone, the sonne
and the moone be In coniunctione in A-
quario .xi. domo. Aries. is prima domus, si-
gne ascendent and, Mars, is, dominator.
Also whē the sonne entresth in the first
degree, of Aries, the .xi. daye of March,
Aries, is, .ix. domo & Mars dominator. **Also**
whē the sonne entred the first point,
of Cancer, Aries. is i domus, signe ascen-
dant, & Mars dominatur ascendente. Also
I say that, Mars recto progreditur hoc toto
anno, therfoze accoꝝdyng vnto the con-
stellation and generall influence of
the Aſtres, is lyke to be greate warre
litige, and varietie among the people:
wherfoze many colerike persons and
martiall by nature, Mauortis agent mu-
nus, quia they shalbe enclined and pro-
uoked vnto great warre stryfe, litige,
and

and disorde, In Germania, in boreali regione,
also In pluribus Ciuitatibus, & magnis
urbibus Italiae.

Of dearth and Plenty.

In this yeare. 1560 Corne shall
well prosper, and shall haue a
good growyng yere, but wheat
and rye, shall haue greate harme in
the lowe Countreys by the floudes,
and the abundance of raynes in the
wynter, otes, barley, beanes, peason,
vetche, and other Corne shall prosper
well, and haue good growynge thys
yeare, if they be sowne be tyme. For it
is to be feared, the sommer to be exce-
dyng hot and dry, by raison of Mars,
that shall increase the great burnyng
heate of the sonne in the sommer.
Also all maner of frutes shall haue
good success and a meteley growyng
yeare, as aples peates, prunes, nuts,
and others frutes, but they shall be in
perill

perill in the first blossom in Marche,
and begynning of Aprill, by reason of
some hoare frost, & wynd west north &
northwest, or east northeast, in Marche
& begynnyng of Aprill. I say, also that
crutes shall be of small stature thys
yeare. All maner of catell shall pro-
spere well in thys present yeare,
but y cattel that lye in the field
and in the marish groundes
shall suffre muche, and be
brought verpe lowe,
by reason of ex-
cedyng colde
wether,
and sometime excedyng moyst, I say
also, that in the sommer, in
the hyghe Countrey shall
lacke grasse and
pasture.

1560
